FILLING MACHINE:

- Easy Set Up and Operation
- Filling ranger: 2mL and greater
- Patented Precision Pumping & Metering System
- Filling accuracy: +/- 0.009%
- Electronic Display and Controls
- Servo Indexing and Height Leveling for Superior Accuracy
- Variable Pump Speeds
- Mobile System Allows for Easy Movement
- Single Operator System Dramatically Reduces Labor Costs
- All Electric System (No Air Compressor Needed)
- Entire System Operates on 110 Volts AC
- Easy to Change Filling Harness Takes Less Than 6 Minutes
- No Clean Up Necessary Between Flavor Changes
- 25 Bottles Filled in Under 30 Seconds
- Continuous Process Allows Single Operator To Fill, Cap & Label
- Approximately 3,000 Bottles Filled, Capped & Labeled Per Hour
- Made In USA
